

Pressure Feed Tank

Features

- lightweight & strong body construction
- easy to operate
- Greater control without the fear of spilling or interruption of paint supply
- long life with minimum maintenance

Stirrer

Pressure gauge & regulator

Areas of Application

Industry

Marine

Railways

Infrastructure

Wood, Ceramic, Leather

Automobile

Advantages

- Frequent refilling of cup is not required reducing refilling time, spillage and wastage of material
- Bulk thinning of paint to the required viscosity is possible resulting in reduced colour variation, with agitation eliminating variation in finishing
- Absence of the cup makes the gun lighter. Thus, less effort is required on part of the operator
- Spray gun can be turned in any position without the fear of spilling or interrupting the paint supply providing greater freedom of manipulation to the operator
- Increased productivity and higher rate of coverage

TECHNICAL DATA

Containers Capacity	10 Litres
Maximum Air Inlet Pressure	60psi (4 bar)
Weight of tank	17.56 Kg

Available soon - 5, 20 and 40 Litres
