

## Pressure Feed Tank PFT-10

### Features

- Lightweight & strong body construction
- Easy to operate
- Greater control without the fear of spilling or interruption of paint supply
- Long life with minimum maintenance
- Available Soon - 5, 20 & 40 litres

Stirrer

Pressure gauge & regulator

### Areas of application

Industry

Marine

Railways

Infrastructure

Wood, ceramic, leather

Automobile

### Advantages

- Frequent refilling of cup is not required reducing refilling time, spillage and wastage of material
- Bulk thinning of paint to the required viscosity is possible resulting in reduced colour variation, with agitation eliminating variation in finishing
- Absence of the cup makes the gun lighter. Thus, less effort is required on part of the operator
- Spray gun can be turned in any position without the fear of spilling or interrupting the paint supply providing greater freedom of manipulation to the operator
- Increased productivity and higher rate of coverage

### TECHNICAL DATA

Containers capacity	10 Litres	20 Litres
Maximum air inlet pressure	60psi (4 bar)	60psi (4 bar)
Weight of tank	17.5 Kgs	21.5 kgs
Available soon - 40 litres
